SIMULATION OF NONSTATIONARY PROCESSES IN THE
MECHANICAL SYSTEMS AND THE SYSTEMS OF OTHER
PHYSICAL NATURE**

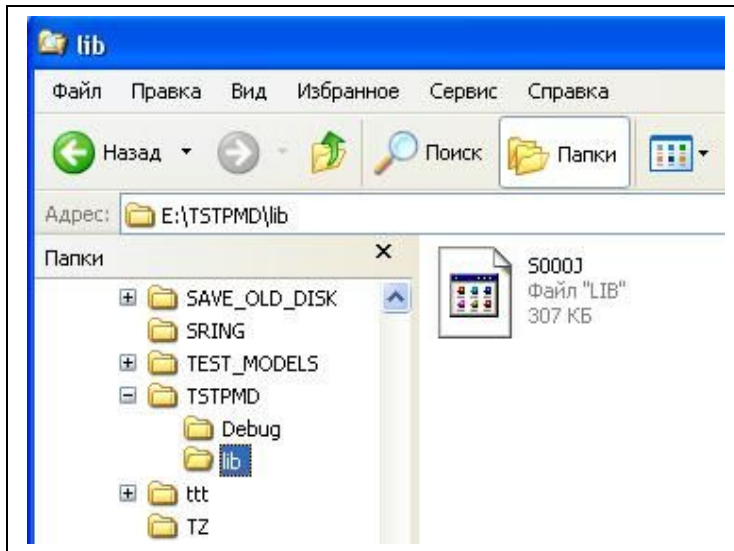

VERSION 4.3

1. Content

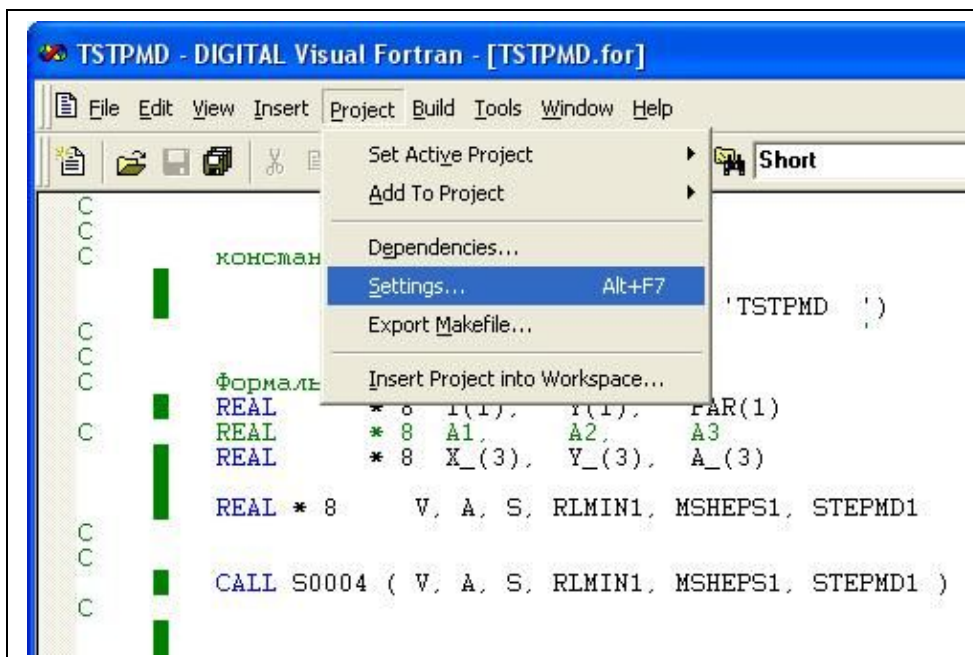

1. Content.....	2
2. Description.....	3

2. Description

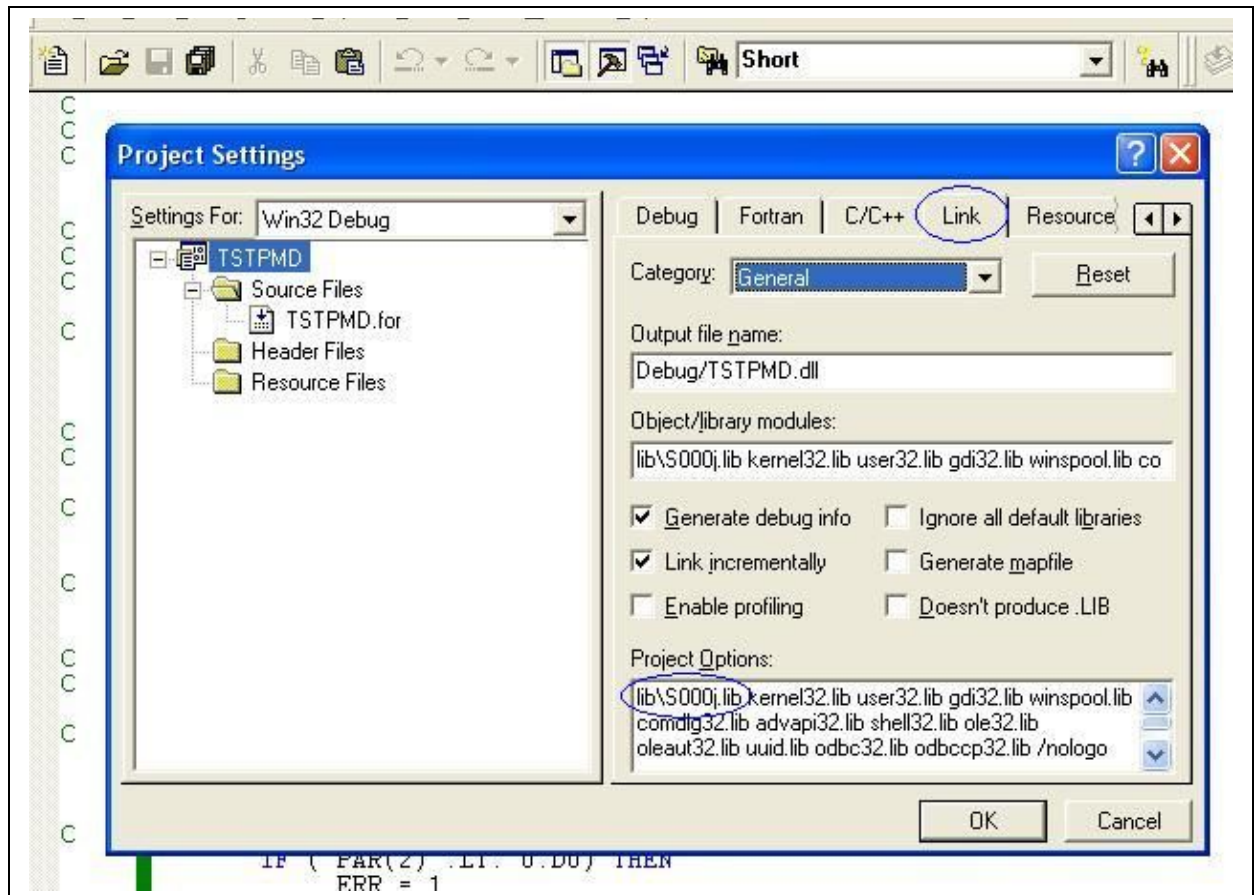

1. Create the folder **of lib** inside the folder of your project as this shown in the figure. In this example the design of model is called **TSTPMD**:

2. Copy into this new folder the file **Of s000J.lib**
3. Open the design of your model into Visual Of studio ', select the point of the menu **Of project -> Settings...** as this is shown in the figure:

4. In the appeared dialog box select the laying **Of link** as this shown in the figure. In the point **Of project Of options:** add the following line: **lib \ Of s000j.lib**. In the figure this additional line is isolated with the dark-blue oval:

5. After this, it is possible to compile project.
